# REBECCA MENDOZA MA – ARTIST

Prime Studios, Ward Royal Parade, Alma Road, Windsor SL4 3HR

I recently returned from living abroad, where, after several years, I had built up a network of various computing experts whose skills I was able to employ for differing aspects of computing, in the knowledge that my projects were in safe hands. Over the years I had 2 websites built, including a bilingual site, so when I returned to the UK, and my last website had become 'defunct' and impossible to edit, I had to find someone to build a new site.

Being over 60 I am not hugely computer literate and it is daunting and stressful to think of trying to find someone who not only has the relevant skills and knowledge to construct a good website but is also kind, patient and amenable and who is willing to explain technical processes clearly and calmly. I am an artist and I know what I want in visual terms and how (and why) I want the site to operate. I want it to be simple to navigate for users and to present many visual images in a straightforward, clear but elegant fashion. It is also vital for me to be able to upload images and text and that I am able to edit and expand the site myself.

Luckily for me it was Edward that was recommended to me and I therefore have the website I wanted, constructed by a person who listened and encouraged and supported and to whom I feel I can turn if I need assistance and advice and who is always amenable, He also has a sense of humour – a characteristic he might need with me !
